AWESOME CYBER SECURITY HEAVEN · REALM DOSSIER · 2026 EDITION

The Bastion

Hardening & Defensive Infrastructure Tools

33	187,488	85%	25
FREE TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects; the full inventory keeps every curated entry.

Part of **Awesome Cyber Security Heaven** — 438 curated free tools across 14 realms.

REALM BRIEF

Lock it down before they get in — auditing, hardening and host/network defense tooling.

FIELD INTELLIGENCE (AI-ASSISTED)

The Bastion's hardening and defensive infrastructure tools domain shows strong maturity, with 33 free tools, 28 hosted on GitHub, and a combined 187,488 total stars, 25 of which received code pushes in 2026. The star distribution reveals a well-established field: legacy tools like Fail2ban (18.8k stars, 2011) and OpenVPN (14.7k stars, 2012) anchor the top tier, while newer entrants such as CrowdSec (15.2k stars, 2020) have earned comparable traction to mid-tier mature tools like Lynis (16.5k stars, 2013). A notable trend is the consolidation of open-source defensive tooling around widely adopted, long-maintained solutions, with GoPhish (14.3k stars, 2013) serving as a leading example of tooling that has become a standard for phishing simulation use cases.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.

LICENSE MIX (GITHUB-HOSTED ENTRIES)

03 Full Inventory

33 entries · every curated tool

Every entry from the heaven list, carrying its live census chips: stars, first release, 2026 activity, license and language. Rising stars and web-native services included.

BSD-3-Clause

the anonymity network: routed egress through thousands of volunteer relays; the standard for privacy-preserving research access.

torproject.org/

Netfilter/iptables

GPL-2.0

the Linux kernel's native packet-filtering framework; the foundation every host firewall build starts from.

netfilter.org/

OpenBSD PF

ISC

the packet filter famous for correctness and readable rules; the syntax OpenBSD, pfSense and OPNsense share.

openbsd.org/faq/pf/

SpamAssassin

Apache-2.0

the veteran open-source spam filter; bayesian scoring and rule engine at the mail gateway.

spamassassin.apache.org/

Qubes OS

GPL-2.0

the security-by-compartmentalization desktop OS; " reasonably secure" by architecture, not by antivirus.
