FIELD INTELLIGENCE (AI-ASSISTED)

The Foundry's DevSecOps, cloud, and container security tools show strong maturity: 29 of 31 free tools live on GitHub, with a combined 206,010 total stars, and 21 received code pushes in 2026, indicating active maintenance. Star distribution reveals a clear field hierarchy: Trivy (38.5k), Semgrep (17.1k), and Prowler (15.0k) lead, while newer tools like OSV-Scanner (11.2k) and Grype (13.0k) have gained traction quickly since their 2020–2022 launches. A notable trend is consolidation around open-source vulnerability scanning, with Trivy and Grype emerging as dominant container image scanners, reducing fragmentation in the cloud-native security space.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
