AI Security & LLM Security Tools

6	22,297	83%	5
FREE TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects; the full inventory keeps every curated entry.

Part of **Awesome Cyber Security Heaven** — 438 curated free tools across 14 realms.

REALM BRIEF

Secure the new surface — guardrails, model-file safety and signing for AI-powered applications.

FIELD INTELLIGENCE (AI-ASSISTED)

The Oracle's Domain AI and LLM security tools show a clear maturity split: the 10.7k-star Awesome Threat Intelligence (launched 2015) is an established, long-running resource, while the remaining five tools (launched 2023) are newer, with NeMo Guardrails leading at 7.3k stars. The star distribution signals growing industry focus on LLM-specific guardrails and model safety, as newer tools outpace smaller niche projects. A notable trend is consolidation around NeMo Guardrails as the most widely adopted open-source LLM security framework among the 2023-launched tools.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
