REALM BRIEF

Security tools with an LLM as the engine — red-team agents, pentest copilots and scenario

FIELD INTELLIGENCE (AI-ASSISTED)

The AI Forge's 9 GitHub-hosted AI security tools, with 93,631 combined stars and 2026 active code pushes, reflect a maturing field where open-source AI-dependent security tooling has gained significant traction. Star distribution shows concentration in top-tier tools: PentAGI (30.7k), promptfoo (26.1k), and PentestGPT (16.0k) account for 88% of total stars, indicating user prioritization of well-established, high-visibility solutions. A notable trend is the consolidation of AI security tooling around tools focused on prompt testing and pentesting, with garak and PyRIT filling niche but complementary roles in the ecosystem.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
