REALM BRIEF

Hack legally — wargames, CTF platforms and deliberately-vulnerable apps to sharpen your skills.

FIELD INTELLIGENCE (AI-ASSISTED)

The Proving Grounds CTF practice and hacking training ecosystem is mature, with 74 free tools (32 hosted on GitHub) boasting 120,173 combined stars, reflecting a well-established field of cybersecurity training resources. Star distribution shows long-standing tools like DVWA (13.8k stars, 2013) and pwntools (13.8k stars, 2013) lead, indicating sustained demand for foundational, versatile training assets over newer entries. A notable trend is the consolidation of popular, multi-purpose tools—such as pwntools spanning binary exploitation and OWASP Juice Shop for web app testing—reducing the need for disjointed niche resources.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
