AWESOME CYBER SECURITY HEAVEN · REALM DOSSIER · 2026 EDITION

The Watchtower

Threat Intelligence Tools & Feeds

16	55,928	62%	10
FREE TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects; the full inventory keeps every curated entry.

Part of **Awesome Cyber Security Heaven** — 438 curated free tools across 14 realms.

REALM BRIEF

See what's coming — intel platforms, knowledge bases, ransomware trackers and exposure watchtowers.

FIELD INTELLIGENCE (AI-ASSISTED)

The Watchtower threat intelligence tools feed's 16 free tools (10 on GitHub, 55,928 combined stars) show a mature, established field with long-running core projects: SpiderFoot (2012, 23.5k stars) leads, followed by OpenCTI (2018, 10.2k) and MISP (2013, 6.6k), while newer tools like IntelOwl (2019, 4.8k) and firehol/blocklist-ipsets (2015, 3.9k) fill specialized gaps. Star distribution confirms sustained community investment in foundational open-source threat sharing and reconnaissance tools, with 10 projects receiving code pushes in 2026 indicating ongoing maintenance. A notable trend is consolidation around interoperable platforms: OpenCTI and MISP, both designed to integrate with third-party feeds, are emerging as central hubs for teams unifying threat data from tools like SpiderFoot and IntelOwl.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
