AWESOME CYBER SECURITY HEAVEN — REALM DOSSIER · 2026 EDITION

The Free Bazaar

Free Cybersecurity APIs, Feeds & Data

55	146,002	76%	19
FREE TOOLS	COMMUNITY STARS	ON GITHUB ACTIVE	ACTIVE IN 2026

55 tools · Part of Awesome Cyber Security Heaven — 1481 curated free tools across 14 realms · Data verified 2026-11-14 (re-verified monthly)

CURATOR'S NOTES

Free-tier services and keyless data — the APIs and feeds you can call today without a credit card. Free tiers shrink; we re-verify this realm's limits on every monthly pass and annotate the moment a vendor tightens them.

MAINTENANCE SNAPSHOT (2026-11-14)

- **Active in the last 30 days:** 15 of 25 tracked GitHub repos (60%)
- **Quiet classics (no push in 12+ months, still listed):** EVTX-ATTACK-SAMPLES, Security Datasets, MITRE Cyber Analytics Repository, Boss of the SOC (BOTS), cyber-threat-intel-rss-feeds
- **Earliest entries:** SecLists (2012), Awesome Pentest (2014), Awesome Web Hacking (2015)

FLAGSHIP PICKS — THE HEAVYWEIGHTS

TOOL	★ STARS	CREATED	LAST PUSH	WHAT IT DOES
SecLists	74.5k	2012	2026-11-01 ✅	SecLists is the security tester's companion. It's a collection of multiple types of lists used during security...
Awesome Pentest	27.6k	2014	2026-07-25	A collection of awesome penetration testing resources and tools
Trickest CVE	8.2k	2022	2026-10-16 ✅	Gather and update all available and newest CVEs with their PoC.
Awesome Web Hacking	7.3k	2015	2026-10-29 ✅	A list of web application security
EVTX-ATTACK-SAMPLES	2.6k	2019	2023-01-24 ⏳	Windows Events Attack Samples
Destroylist	2.1k	2025	2026-11-01 ✅	Real-time phishing & scam domain blocklist - 205k+ curated threats, 1M+ community, free API, multiple form...

Full inventory — 55 curated tools · ranked by GitHub adoption · 2026-11-14 census · non-GitHub tools listed without stars

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
SecLists	74.7k	2012	2026-11-11 ✅	— the security tester's wordlist collection: usernames, passwords, URLs, fuzz payloads — the one corpus everyone uses. Used by every pentester and bug hunter for wordlists; the standard free collection no commercial tool improves on.
Awesome Pentest	27.7k	2014	2026-07-25 ✅	— the most-starred pentest resource collection; the community canon. Used by practitioners navigating the pentest tool landscape. (CC-BY-4.0, curated list)
Trickest CVE	8.2k	2022	2026-11-10 ✅	— gathers and updates all available and newest CVEs with their PoCs. Used by researchers tracking fresh exploit code for newly published CVEs; a comprehensive public CVE+PoC index. (MIT)
Penetration_Testing_POC	7.6k	2019	2026-11-14 ✅	— long-running Chinese-language PoC archive: ~530 CVEs and ~1,800 linked GitHub PoCs across IoT, web apps, privilege escalation and PC software, auto-updated every six hours by an LLM-triaged GitHub Actions pipeline since 2019. Used by researchers and triage pipelines hunting public PoCs by CVE; the Chinese-source PoC index Western lists miss. (Apache-2.0)
Awesome Web Hacking	7.4k	2015	2026-10-29 ✅	— curated web-security research: talks, papers and tooling. Used by web hunters collecting methodology resources. (MIT, curated list)
bounty-targets-data	4k	2017	2026-11-14 ✅	— hourly-updated data dumps of public bug bounty and VDP scopes from HackerOne, Bugcrowd, Intigriti and more, in machine-readable JSON. Used by bug hunters and recon pipelines tracking in-scope targets and scope changes automatically; the dataset most bounty automation is built on. (MIT, dataset)

EVTX-ATTACK-SAMPLES	2.6k	2019	2023-01-24 ⏳	— a large collection of real Windows event logs capturing ATT&CK techniques — test detections without a lab; frozen dataset by design. Used by detection engineers replaying attack artifacts in Windows event logs; the free sample corpus for rule testing. (GPL-3.0)
Destroylist	2k	2025	2026-11-12 ✅	— real-time phishing, scam and crypto-drainer domain blocklist: 205k+ manually curated plus 1M+ community-aggregated domains, DNS-verified and shipped as keyless hosts/AdGuard/RPZ/JSON feeds for any DNS firewall. Used by defenders blocking live phishing infrastructure at Pi-hole/AdGuard scale; the community blocklist for next-gen DNS filtering. (MIT)
Security Datasets	1.8k	2018	2024-03-20 ⏳	— OTRF's library of pre-recorded adversary-emulation event logs (Mordor's successor home) for detection testing; frozen library by design. Used by detection engineers testing content against realistic telemetry; the free datasets for purple-team validation.
Splunk security_content	1.7k	2018	2026-11-12 ✅	— the maintained detection-content corpus: thousands of searches and analytic stories mapped to ATT&CK. Used by Splunk SOC teams deploying detections; the free ES content library from the research team.
PoC Index	1.6k	2024	2026-11-12 ✅	— search public CVE PoCs across GitHub, Nuclei, ExploitDB, Metasploit and Vulhub, with CVSS, EPSS and CISA KEV context. Used by defenders prioritizing what actually has exploit code; the searchable index of public PoC sources. (MIT)
nuclei-wordfence-cve	1.3k	2023	2026-11-11 ✅	— daily-regenerated corpus of 87k+ Nuclei templates covering WordPress core, plugin and theme vulnerabilities, built from Wordfence's production threat-intel feeds with recalculated severities. Used by WordPress security teams extending nuclei scans beyond the default template packs; the keyless machine-curated WP vulnerability feed. (MIT)
can-i-take-over-dns	1.1k	2021	2026-08-13 ✅	— the canonical community reference of DNS takeover fingerprints: which dangling NS records are exploitable per provider, which are safe, with vendor evidence links. Used by bug bounty hunters triaging dangling DNS records before claiming takeover; the community-maintained takeover oracle. (community reference)
MITRE Cyber Analytics Repository	1k	2018	2025-05-16 ⏳	— CAR: curated, versioned detection analytics with full logic and ATT&CK mappings. Used by detection engineers implementing analytics; the free repository of detection logic mapped to ATT&CK.
Splunk attack_data	841	2020	2026-11-11 ✅	— curated attack datasets for detection validation, mapped to MITRE techniques. Used by detection engineers replaying attacks in Splunk; the free datasets for content validation. (Apache-2.0)
Boss of the SOC (BOTS)	523	2020	2020-06-18 ⏳	— Splunk's public blue-team CTF dataset: full realistic telemetry for investigations, CC0 data; frozen CTF dataset by design. Used by training teams running SIEM CTFs; the free Splunk datasets behind the famous range.
Bug Bounties	477	2023	2026-11-11 ✅	— community-maintained directory, MCP and API of 3,000+ active bug bounty programs and VDPs. Used by hunters picking targets and checking scope before engaging; the open dataset for program discovery. (MIT)
vulnerability-poc	137	2025	2026-11-12 ✅	— CVE proof-of-concept labs, exploit scripts and matching detection and prevention rules (Nginx, Apache, Snort, YARA) for high-severity CVEs, with a machine-readable catalog. Used by detection engineers and researchers reproducing and detecting real CVEs; the free PoC-plus-detection corpus.. (Apache-2.0)
cyber_rss	103	2026	2026-05-15 ✅	— Organized list of security feeds covering CERT advisories, vulnerabilities, vendor advisories, malware, and exploit research. Used by SOC analysts and researchers; a broad feed aggregation resource.
Trickest Cloud	95	2023	2026-11-12 ✅	— weekly-refreshed SSL-certificate dataset covering all AWS EC2 and GCP public IPv4 ranges; captures self-signed, ephemeral and never-CT-submitted certificates that CT logs miss. Used by attack-surface teams enriching cloud IP inventories with certificate data; the free weekly cloud-cert dataset. (MIT, dataset)
HProxy Free Proxy List	88	2026	2026-11-12 ✅	— continuously verified keyless proxy feed: 100+ public sources re-tested daily for protocol, anonymity grade, geolocation, latency and uptime, served as txt/JSON/CSV plus a free API and MCP server. Used by security teams auditing whether their own IP space appears on public proxy feeds — detection intel, never egress infrastructure. (MIT)
infosec-opml	69	2022	2026-11-09 ✅	— Curated collection of 366 information security RSS and Atom feeds organized by reading action and urgency. Used by analysts and researchers; a ready-made feed bundle for any RSS reader. (MIT)

onion-lookup	65	2024	2026-01-05 ✅	— a free API for .onion existence checks; part of the AIL stack. Used by researchers checking dark-web onion services safely; the free lookup for onion intelligence. (AGPL-3.0)
cyber-threat-intel-rss-feeds	7	2025	2025-09-29 ⏳	— Curated list of cybersecurity threat intelligence blogs and RSS feeds for SOC analysts and researchers. Used by defenders building awareness; a convenient feed starter set.
abuse.ch	—	—	—	— the free malware-intel feed suite: URLhaus, ThreatFox, MalwareBazaar and Feodo Tracker. Used by defenders consuming URLhaus, MalwareBazaar and ThreatFox feeds; the free threat feeds many commercial products ingest.
AbuseIPDB	—	—	—	— community-driven IP-abuse reports with a free API (1,000 checks/day). Used by firewall admins checking and reporting malicious IPs; the free crowd-sourced reputation feed.
AlienVault OTX	—	—	—	— open threat exchange: community-contributed threat pulses with a free API. Used by SOC teams exchanging threat indicators; the free open threat-exchange with millions of pulses.
Censys	—	—	—	— internet asset search with certificate-aware pivots; free academic/community tier. Used by CTI teams hunting certificates and services across the internet; the free-tier search companion to Shodan. (free tier)
Chaos	—	—	—	— the internet-wide subdomain dataset from ProjectDiscovery; free for community use. Used by bug bounty hunters discovering subdomains via ProjectDiscovery's free API; the free attack-surface dataset. (free API)
CISA KEV Catalog	—	—	—	— the Known Exploited Vulnerabilities list; patch-first prioritization, straight from the source. Used by patch-priority teams worldwide; the free authoritative list of actively exploited vulnerabilities.
Exploit-DB	—	—	—	— the classic public exploit archive and Google Hacking Database; still where PoCs surface first. Used by pentesters finding public exploit references; the veteran free exploit archive.
FIRST EPSS	—	—	—	— exploit-prediction scores for every CVE — probability-based patch prioritization, free data. Used by risk teams scoring exploitation probability for patch prioritization; the free open data model replacing gut-feel CVSS-only triage.
GreyNoise	—	—	—	— classifies internet-wide scanner noise so your team can ignore it; free community API. Used by SOC teams separating internet background noise from real targeting; the community API is free.
HaveIBeenPwned	—	—	—	— breach database lookups for emails and whole domains, with a free API. Used by everyone from helpdesks to auditors checking breach exposure; the free breach-notification standard.
MDN HTTP Observatory	—	—	—	— Mozilla's free no-key scanner that grades your site's security headers and best practices. Used by web developers scoring site security headers; the free Mozilla scanner for quick posture checks.
NVD	—	—	—	— the National Vulnerability Database feeds and API (free API key) — the backbone of CVE enrichment. Used by every security team for CVE enrichment; the free NIST vulnerability database the industry keys on.
OpenSanctions	—	—	—	— open data on sanctioned entities and PEPs; the compliance watchlist as a dataset. Used by compliance investigators screening entities against watchlists; the free open-data alternative to commercial screening services. (open data)
OSV.dev	—	—	—	— Google's open-source vulnerability database with a clean free API and per-package queries. Used by developers checking OSS vulnerabilities; Google's free vulnerability database for supply chains.
Packet Storm	—	—	—	— the advisory and exploit-db archive; a quarter-century of security disclosures. Used by researchers tracking advisories and tool releases; the veteran free security archive. (free service)
PhishTank	—	—	—	— the community phishing-URL database with a free API. Used by mail defenders validating phishing URLs; the free community phishing database.
SearchWebCode	—	—	—	— search engine over the HTML/JS/CSS of 127M websites; source-level search without crawling. Used by hunters searching public code for exposures; the free code-search angle for recon. (free service)
Shodan	—	—	—	— the search engine for internet-exposed devices; free tier plus Monitor alerts for your own assets (free tier) Used by CTI analysts and bug hunters mapping exposed assets; freemium with free-tier lookups.

urlscan.io	—	—	—	— URL scanning with sandbox screenshots and full resource capture; free tier. Used by analysts detonating and inspecting URLs safely; the free-tier scanning and screenshot service. (free tier)
VirusTotal	—	—	—	— the multi-engine file/URL reputation service with a free public API. Used by SOC analysts everywhere for file, URL and domain reputation; the multi-engine standard, free for basic use.
Netlas	897	2023	2026-09-18	— internet-registry search, free research tier. (free tier)
Quttera Website Security API	—	—	—	— API for malware detection, reputation checks, and website security analysis. Used by developers and SOC teams; a practical feed for wiring scanning into their own pipelines. (free tier)
IP Geolocation	—	—	—	— IP geolocation and threat intelligence API covering location, company, ASN, and VPN or proxy and Tor usage. Used by developers and analysts; a free-tier feed for enriching IP data. (free tier)
WhoisFreaks	—	—	—	— Domain WHOIS, historical WHOIS, and DNS intelligence API for tracking ownership and registration timelines. Used by investigators and developers; a free-tier feed for domain attribution. (free tier)
APIFreaks	—	—	—	— API hub delivering over a hundred real-time endpoints across IP, domain, and email intelligence categories. Used by developers and analysts; a broad free-tier feed for enrichment lookups. (free tier)
IP2Location.io	—	—	—	— IP geolocation and intelligence API returning location, network, and related details for addresses. Used by developers and analysts; a free-tier feed for enriching IP data. (free tier)
ipapi.is	—	—	—	— IP intelligence and geolocation service identifying locations, ISPs, hosting providers, and VPN or proxy connections. Used by developers and fraud teams; a free-tier feed for IP enrichment. (free tier)
ProxyDetect.live	—	—	—	— Proxy detection service that checks IP addresses for proxies, VPNs, and other anonymization services. Used by defenders and fraud analysts; a free lookup for flagging anonymized traffic. (free, proprietary)
urlcap	—	—	—	— HTTP capture and analysis API for inspecting requests and responses, extracting structured data, and detecting bots. Used by developers and defenders; a free-tier feed for web traffic analysis. (free tier)
SatNOGS DB	—	—	—	— Open database of satellite frequencies, modulations, and operational status maintained by the SatNOGS community for planning satellite signal reception. Used by ground-station operators and satellite researchers; a community-curated frequency reference.
Emailrep.io	—	—	—	— Email reputation and breach API. Used by defenders and developers; a feed for assessing address risk. (free tier)
