FREE TOOLS	COMMUNITY STARS	ON GITHUB ACTIVE	ACTIVE IN 2026

139 tools · Part of Awesome Cyber Security Heaven — 1481 curated free tools across 14 realms · Data verified 2026-11-06 (re-verified monthly)

CURATOR'S NOTES

Identifier intelligence without touching the target: stealer-log exposure lookups, phone footprints, historical web archives, username correlation. Passive by design — nothing here alerts the subject of a query.

MAINTENANCE SNAPSHOT (2026-11-06)

- **Active in the last 30 days:** 27 of 49 tracked GitHub repos (55%)
- **Quiet classics (no push in 12+ months, still listed):** GitFive, chiasmodon
- **Earliest entries:** Nipe (2015), check-if-email-exists (2017), Mitaka (2018)

FLAGSHIP PICKS — THE HEAVYWEIGHTS

TOOL	★ STARS	CREATED	LAST PUSH	WHAT IT DOES
maigret	39.6k	2020	2026-10-31 ✅	🕵️ Collect a dossier on a person by username from 6K websites
changedetection.io	35.4k	2021	2026-10-31 ✅	Best and simplest tool for website change detection, web page monitoring, and website change alerts. Perfect f…
web-check	35.3k	2023	2026-10-30 ✅	🕵️ All-in-one OSINT tool for analysing any website
PhoneInfoga	18.3k	2018	2026-08-25	Information gathering framework for phone numbers
Osintgram	15.3k	2019	2026-10-30 ✅	Osintgram is a OSINT tool on Instagram. It offers an interactive shell to perform analysis on Instagram accoun…
Photon	13.3k	2018	2026-10-17 ✅	Incredibly fast crawler designed for OSINT.

Full inventory — 139 curated tools · ranked by GitHub adoption · 2026-11-06 census · non-GitHub tools listed without stars

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
maigret	39.6k	2020	2026-10-31 ✅	— builds a full dossier from a single username across thousands of sites; powerful people-OSINT — authorized investigations only. Used by OSINT investigators generating full username reports across platforms; the Sherlock successor with report output.
changedetection.io	35.4k	2021	2026-10-31 ✅	— self-hosted website change monitoring with selectors, visual diffs and dozens of notification targets. Used by investigators and ops teams monitoring pages for changes; the open-source alternative to commercial change-monitoring SaaS.
web-check	35.3k	2023	2026-10-30 ✅	— all-in-one website OSINT dashboard — DNS, headers, tech, ports, TLS, whois and more — self-hostable in one Docker pull. Used by bug hunters and defenders getting a full technical profile of any site in one page; the free all-in-one site analyzer.
PhoneInfoga	18.3k	2018	2026-08-25	— phone-number OSINT: carriers, reputation and footprint from public sources, no scraping of private data. Used by investigators profiling phone numbers from public sources; the standard free phone-OSINT scanner. (GPL-3.0)
Osintgram	15.3k	2019	2026-10-30 ✅	— interactive Instagram OSINT (followers, public emails/phones, geotags, posting patterns); requires an Instagram account — authorized research only. Used by investigators with authorized access profiling Instagram accounts; the open Instagram OSINT toolkit. (GPL-3.0)

Photon	13.3k	2018	2026-10-17 ✅	— fast OSINT crawler that rips a target apart for emails, social profiles, intel files and metadata, with exportable reports. Used by OSINT researchers crawling targets for emails, socials and intel; the fast open crawler for investigations. (GPL-3.0)
check-if-email-exists	10.4k	2017	2026-10-30 ✅	— verify an email address exists without sending any message: SMTP-level mailbox checks with disposable and catch-all detection, self-hostable or as a service. Used by investigators confirming a mailbox is real before deeper checks; the free verifier behind Reacher. (MIT)
Flowsint	10k	2025	2026-10-18 ✅	— self-hosted graph-based OSINT investigation platform: interactive relationship graphs across domains, IPs, emails, phone numbers, people and crypto wallets with automated enrichment modules. Used by investigators and fraud teams visualizing entity links without SaaS exposure; the Docker-deployed alternative to Maltego-class workstations. (Apache-2.0)
Blackbird	9.8k	2022	2026-11-03 ✅	— OSINT tool for searching emails, usernames, and keywords across the dark web and clearnet. Used by investigators and researchers; an open-source way to trace identities across sources.
mosint	6.1k	2020	2024-02-02 ⏳	— Open-source email OSINT tool that checks breaches, linked accounts, and validity. Used by investigators and bug-bounty hunters; a fast email-reconnaissance workhorse. (MIT)
toutatis	4.4k	2020	2024-12-05 ⏳	— Open-source tool that gathers Instagram account info and probes email or phone via password reset. Used by OSINT investigators; a reconnaissance utility for linking accounts to contact details. (GPL-3.0)
Social Mapper	4.1k	2018	2022-02-25 ⏳	— Social media enumeration and correlation tool mapping faces across platforms. Used by OSINT investigators; a powerful identity correlation utility. (GPL-3.0)
gosearch	3.8k	2024	2026-11-01 ✅	— fast concurrent username enumeration across 190+ sites with category-filtered account discovery. Used by OSINT investigators mapping a person's account footprint quickly; the concurrent alternative to sherlock-class username hunts. (GPL-3.0)
FOCA	3.7k	2017	2022-12-08 ⏳	— Metadata extraction and document analysis tool for uncovering hidden information in files. Used by OSINT investigators and pentesters; an open-source way to mine documents for leaked details. (GPL-3.0)
email2phonenumber	2.8k	2019	2024-07-26 ⏳	— Infers a phone number from email account checks. Used by OSINT investigators; a targeted email-to-phone correlation tool. (MIT)
sn0int	2.6k	2018	2026-09-20	— semi-automatic OSINT framework with scriptable modules, its own package ecosystem and a database that remembers everything you've collected. Used by OSINT investigators scripting structured intel gathering; the semi-automatic OSINT framework for serious cases. (GPL-3.0)
Nipe	2.4k	2015	2026-09-13	— a tool to make your traffic pass through the Tor network; redirect the machine's egress for privacy. Used by researchers anonymizing tool traffic through Tor exit nodes; the open anonymity router for sanctioned research. (MIT)
tinfoleak	2.0k	2018	2019-02-06 ⏳	— Open-source tool for Twitter intelligence analysis. Used by OSINT investigators; a complete social media analysis utility. (CC-BY-SA-4.0)
Mitaka	1.9k	2018	2026-10-21 ✅	— IOC-pivot browser extension: search an IP/domain/hash across 30+ engines from the context menu. Used by analysts searching IOCs across 60+ services from the browser; the free browser extension for instant CTI lookups. (MIT)
socialscan	1.9k	2019	2026-10-28 ✅	— accurate email and username existence checks across major platforms by querying signup servers directly instead of scraping profile pages; quiet upstream but still accurate. Used by investigators verifying account existence with fewer false positives; the accuracy-first checker for email and username lookups. (MPL-2.0)
telegram-phone-number-checker	1.9k	2021	2026-08-17	— check which phone numbers are connected to Telegram accounts and pull usernames and names; needs your own Telegram session — authorized research only. Used by investigators with authorized Telegram access linking numbers to accounts; Bellingcat's open checker for sanctioned research. (MIT)
MailAccess	1.7k	2026	2026-10-28 ✅	— email-exposure toolkit that flags breach appearances and stealer-log presence for an address — authorized investigations only. Used by investigators during authorized account-recovery engagements to check email credential exposure; a focused checker for red-team and OSINT work.
WhatBreach	1.7k	2019	2025-08-14 ⏳	— Open-source breach database search tool. Used by OSINT investigators; a scriptable leak lookup. (MIT)

whatsapp-osint	1.6k	2019	2026-10-17 ✅	— monitor WhatsApp online/offline presence and profile signals from a linked session for lawful, authorized investigations only. Used by investigators tracking activity patterns in sanctioned cases; the open WhatsApp presence monitor for lawful research. (MIT)
osi.ig	1.6k	2019	2024-02-01 ⏳	— Instagram OSINT tool that collects profile data and media from public accounts. Used by investigators and researchers; an open-source script for gathering Instagram intelligence.
Taranis AI	1.2k	2023	2026-10-30 ✅	— OSINT gathering and enrichment platform for analysts; self-hostable with an AI-assist layer. Used by CTI teams gathering and briefing intel with AI assistance; the open-source alternative to commercial intel-briefing tools. (EUPL-1.2)
socid-extractor	1.1k	2019	2026-10-26 ✅	— the extraction engine behind Maigret: turn any profile URL into structured identifiers — internal user IDs, linked accounts and hidden page metadata. Used by OSINT investigators pivoting from one profile to linked identities; the maigret author's extractor for deep profile intelligence. (MIT)
GitFive	1k	2022	2025-10-04 ⏳	— GitHub account OSINT: reconstruct a user's footprint from commits, organizations, emails and repo activity to map identities and aliases. Used by investigators tracking GitHub identities across repositories; the deep GitHub profiler for authorized cases. (MPL-2.0)
opensquat	988	2020	2026-10-27 ✅	— watches newly-registered domains for typosquats and brand lookalikes, with free daily feeds. Used by brand-protection teams watching for newly registered lookalike domains; the free alternative to commercial domain-monitoring services. (GPL-3.0)
VoidAccess	967	2026	2026-10-29 ✅	— self-hosted dark-web monitoring platform for threat-intelligence teams. Used by bug hunters dorking for exposed panels and documents; the free web-search automation for recon. (MIT)
Seekr	889	2022	2026-06-16	— self-hosted keyless OSINT toolkit with a desktop-style web UI, person database and account cards. Used by investigators gathering and managing identifier lookups (email via Discord/Spotify/PGP keyservers, username discovery, GitHub→email) with zero API keys; plugin system, Docker/Nix. (GPL-3.0)
TOsint	881	2021	2026-09-30	— Telegram OSINT: user, channel and bot intelligence from public messaging data. Used by investigators mining Telegram accounts and groups from public data; the focused Telegram OSINT client. (GPL-3.0)
raven	799	2017	2020-05-18 ⏳	— LinkedIn information gathering tool for pentesters to collect data on organization employees. Used by red teamers; a people-focused OSINT scraper.
chiasmodon	705	2024	2025-05-10 ⏳	— domain-centric OSINT: pivot from one domain to emails, subdomains, ASN and related-asset intelligence across multiple sources. Used by investigators pivoting from domains, emails and IPs across OSINT sources; the open alternative to commercial attribution tooling.
cyberbro	699	2024	2026-10-19 ✅	— self-hosted IOC reputation station: paste URLs, IPs or hashes and get verdicts from dozens of engines on one page. Used by SOC analysts triaging indicators through multiple OSINT sources in one UI; the free aggregator for daily IOC lookups.
leaker	608	2025	2026-10-09 ✅	— one terminal command, ten public breach databases — passive checks for whether an email or domain appears in known leaks. Used by OSINT researchers searching breach corpora for exposed records; the free alternative to paid breach-search subscriptions.
SoIG	452	2020	2026-06-28 ⏳	— Instagram OSINT tool that retrieves profile information and media from public accounts. Used by investigators and researchers; an open-source utility for Instagram reconnaissance. (MIT)
Marple	333	2021	2026-10-14 ✅	— collect links to profiles by username through search engines, then analyze the results to surface related accounts across platforms. Used by OSINT investigators expanding one username into a full cross-platform profile set; the search-engine profile aggregator from the maigret author. (MIT)
Darkweb-search-engine (Nexvisio…	159	2022	2026-10-31 ✅	— Open-source dark web search engine and crawler with content categories, entity extraction, safety ratings, and ransomware tracking. Used by OSINT researchers and threat analysts; a self-hostable way to search onion services. (MIT)
insto	133	2026	2026-11-01 ✅	— Instagram OSINT tool that gathers profile information and media from public accounts. Used by investigators and researchers; an open-source utility for profiling Instagram targets. (MIT)

IntelHub	127	2025	2026-10-01	— browser extension that runs OSINT analysis locally; no data leaves the analyst's machine. Used by analysts running quick multi-source OSINT lookups from the browser; the free aggregator extension for triage. (MIT)
awesome-osint-repos	92	2026	2026-11-05 ✅	— Continuously updated directory of OSINT tools, skills, plugins and agent integrations. Used by OSINT researchers and investigators; a curated reference for building investigation workflows. (MIT)
darkweb-directory	80	2025	2026-10-01 ✅	— Curated .onion resource list categorized by news, forums, whistleblowing platforms, and search engines. Used by OSINT researchers and privacy users; an open-source starting point for dark web exploration. (MIT)
intel-codex	67	2025	2026-10-31 ✅	— Open-source field manual for OSINT, DFIR and cybersecurity investigations — operational SOPs, browsable online or clonable as an Obsidian vault. Used by OSINT investigators and DFIR responders following tested procedures; the free operational playbook library.. (MIT)
onion-links	28	2025	2026-09-16 ⏳	— Curated list of Tor services for researchers and privacy users, with NSFW tagging and safety review. Used by OSINT researchers and privacy advocates; an open-source, vetted directory of onion services. (MIT)
Dark-Net-Collection	24	2023	2026-03-01 ⏳	— Dark web resource collection including Dread forum, Hidden Wiki, and official Tor Project .onion links. Used by OSINT researchers and investigators; an open-source directory for dark web starting points.
insta-dl	21	2026	2026-09-18 ⏳	— Command-line tool that downloads Instagram profile media for OSINT collection. Used by investigators and researchers; an open-source downloader for archiving public account content. (MIT)
tg-chat-dump	6	2026	2026-10-26 ✅	— archive public Telegram chats to SQLite for structured analysis. Used by researchers exporting Telegram chat history for analysis; the open dump utility for sanctioned investigations. (MIT)
Exposure-Check-OSINT	4	2026	2026-11-01 ✅	— self-hosted personal
aware-online	—	—	—	— OSINT training and tooling from the Dutch awareness school; free investigative resources. Used by OSINT learners building investigation skills; the free training resource behind many analyst onboarding paths. (free service)
HoneyLabs	—	—	—	— free per-IP honeypot-telemetry reports: see whether an address has been tripping sensors worldwide. Used by researchers studying deceptive-security techniques; the honeypot research project for defender experiments.
ip.thc.org	—	—	—	— free, keyless JSON API for reverse DNS, subdomain and CNAME lookups on any IP — the quick IP pivot. Used by analysts quickly checking IP reputation and attributes; the free no-frills lookup service.
LeakLens	—	—	—	— non-commercial breach registry with a keyless phone, email, username and password exposure audit API. Used by anyone auditing their own (or authorized) identifier exposure without accounts or fees; the free keyless breach-lookup service. (free service, non-commercial)
OSINT-Framework	—	—	—	— the classic OSINT tool index: categorized sources from public records to social analysis. Used by investigators navigating the OSINT tool landscape; the classic free index that commercial trainings reference. (free service)
ScamSearch	—	—	—	— scammer profile lookup by phone, email or username; crowdsourced anti-fraud intel. Used by fraud investigators checking scammers against a public database; the free lookup for scammer attribution. (free service)
WhatsMyName	—	—	—	— web app plus open database for checking one username across hundreds of platforms at once; keep lookups lawful and authorized. Used by OSINT investigators checking usernames across hundreds of sites; the open web project behind many commercial aggregators.
Whonix	—	—	—	— the anonymity-focused OS: a Workstation VM routed entirely through a Tor Gateway VM. Used by journalists and researchers needing compartmentalized anonymity; the free VM-based anonymity workstation. (GPL-3.0)
InfoHound	162	2023	2025-10-08	— OSINT framework: people, emails, domains, leaks. (AGPL-3.0)
Investigo	285	2018	2026-07-03	— username/email finder across social networks. (MIT)
EmailHarvester	992	2016	2026-06-07	— email enumeration via search engines. (GPL-3.0)
Instaloader	13752	2016	2026-10-26 ✅	— Instagram archiving with metadata. (MIT)
gallery-dl	20322	2014	2026-10-31 ✅	— gallery/video downloader for hundreds of sites. (GPL-2.0)

github.com/Ra...77/awesom... · CC0 · The ... ...

Osintly	—	—	—	— All-in-one OSINT platform combining hundreds of search modules, public data sources, and intelligence APIs. Used by investigators and researchers; a free-tier hub for people and data searches. (free tier)
OnionLand Search	—	—	—	— Deep-web search engine that indexes Tor onion services. Used by OSINT researchers and investigators; a free way to search hidden services without a crawler of their own. (free, proprietary)
OSINT Search	—	—	—	— Live OSINT search engine for matching profiles, former usernames, and traces of deleted accounts. Used by investigators and researchers; a free lookup for piecing together online identities. (free, proprietary)
Ahmia	—	—	—	— Tor-recommended dark web search engine that filters illegal content and is reachable via clearnet and Tor. Used by OSINT researchers; a free way to search onion services. (free, proprietary)
osint-toolbox-mcp	—	—	—	— OSINT toolbox MCP server integrating Sherlock, Maigret, GHunt, theHarvester, and SpiderFoot. Used by investigators and AI-assisted researchers; an open-source way to orchestrate OSINT tools.
osint-mcp	—	—	—	— OSINT aggregation MCP service covering email, username, phone, Shodan, VirusTotal and leak detection. Used by investigators and OSINT analysts; a convenient multi-source lookup bridge.
osint-darkweb-pkg	—	—	—	— Modular dark web OSINT tool aggregating over 15 dark web search engines with concurrent .onion content scraping. Used by dark web researchers and investigators; a broad search aggregator.
Databases - start.me	—	—	—	— Curated start.me page listing various databases useful for OSINT research. Used by OSINT investigators; a handy public-records link collection.
Hudson Rock	—	—	—	— Checks whether an email or domain was compromised by infostealer malware, using a maintained cybercrime database. Used by investigators and defenders; a breach exposure lookup service. (free tier)
breachdirectory	—	—	—	— Free API for looking up email and username appearances in breach data. Used by investigators and defenders; a quick exposure check against known leaks. (free tier)
LibraryOfLeaks	—	—	—	— Free searchable index of leaked data collections for breach research. Used by OSINT investigators and defenders; a lookup resource for exposed records. (free, proprietary)
Have I Been Ransomed?	—	—	—	— Free check for whether an email appears in ransomware leak data. Used by defenders and incident responders; a quick ransom exposure lookup. (free, proprietary)
IDCrawl	—	—	—	— Free people search returning real profile records from public sources. Used by OSINT investigators; a name-to-profile lookup. (free, proprietary)
WebMii	—	—	—	— Free name-based search surfacing people and web visibility. Used by OSINT researchers; a quick person-to-web presence lookup. (free, proprietary)
Free People Search	—	—	—	— Free US people records lookup for names, addresses, and phones. Used by investigators; a public-records people search. (free tier)
fastpeoplesearch	—	—	—	— Free people search returning addresses and phone numbers. Used by OSINT investigators; a US person-to-contact lookup. (free, proprietary)
International	—	—	—	— Free international phone and address directory lookup. Used by investigators; a cross-country contact directory search. (free, proprietary)
PeekYou	—	—	—	— Free people search linking individuals to real social profiles. Used by OSINT researchers; a person-to-social-account lookup. (free, proprietary)
White Pages	—	—	—	— Free basic phone and address people lookup. Used by investigators; a US directory search for contact details. (free tier)
New Canada 411	—	—	—	— Free Canadian phone directory lookup. Used by OSINT researchers; a reverse phone search for Canadian numbers. (free, proprietary)
411	—	—	—	— Free US phone and people directory lookup. Used by investigators; a reverse phone and name search. (free, proprietary)
zaba search	—	—	—	— Free people search drawing on public records. Used by OSINT investigators; a name-to-record lookup. (free, proprietary)

Thats them	—	—	—	— Free people search aggregating public records. Used by investigators; a consolidated person lookup. (free, proprietary)
People search	—	—	—	— Free partial people and address records search. Used by OSINT researchers; a limited public-records lookup. (free tier)
Ufind.name	—	—	—	— Free name search returning real profile links. Used by investigators; a name-to-profile discovery tool. (free, proprietary)
Email Lookup	—	—	—	— Email lookup surfacing Google, Gravatar, and registration traces. Used by OSINT investigators; an email-to-account discovery tool. (free tier)
holehe	—	—	—	— Open-source tool checking per-site email registration across many services. Used by OSINT researchers; a fast email account enumeration utility. (GPL-3.0)
user-scanner	—	—	—	— Open-source per-site email registration checker. Used by OSINT investigators; an email account enumeration tool. (free, proprietary)
Phonebook.cz	—	—	—	— Free leak and email data search engine. Used by OSINT investigators; a lookup for exposed addresses and domains. (free, proprietary)
Email Breach Analysis	—	—	—	— Checks an email against breach data. Used by defenders and investigators; a quick exposure lookup. (free, proprietary)
h8mail	—	—	—	— Open-source breach email lookup tool. Used by investigators and defenders; a scriptable exposure search. (MIT)
Reverse Phone Lookup	—	—	—	— Free reverse phone lookup service returning names tied to numbers. Used by OSINT researchers and investigators; a quick people-search lookup for phone numbers. (free, proprietary)
Validnumber.com	—	—	—	— Free phone lookup service returning carrier, line type, and owner details. Used by OSINT researchers and fraud analysts; a quick phone-number intelligence lookup. (free, proprietary)
NumLookup	—	—	—	— Free reverse phone lookup returning carrier and name information. Used by OSINT investigators and researchers; a simple people-search lookup for phone numbers. (free, proprietary)
Free Reverse Phone Lookup	—	—	—	— Free reverse phone lookup returning name and line type for numbers. Used by OSINT researchers and investigators; a quick caller-identification lookup service. (free, proprietary)
ZLOOKUP	—	—	—	— Free reverse phone lookup service returning names tied to numbers. Used by OSINT investigators and researchers; a simple people-search lookup for phone numbers. (free, proprietary)
USPhonebook	—	—	—	— Free reverse phone lookup returning name and address details. Used by OSINT researchers and investigators; a people-search lookup for US phone numbers. (free, proprietary)
CallerID Test	—	—	—	— Free reverse phone and caller lookup service. Used by OSINT investigators and researchers; a quick caller-identification lookup for phone numbers. (free, proprietary)
ThatsThem Phone Lookup	—	—	—	— Free reverse phone lookup returning names and addresses. Used by OSINT researchers and investigators; a people-search lookup for phone numbers. (free, proprietary)
NumberGuru	—	—	—	— Free reverse phone lookup service returning names tied to numbers. Used by OSINT researchers and investigators; a simple people-search lookup for phone numbers. (free, proprietary)
Reverse Australia	—	—	—	— Free reverse phone lookup service focused on Australian numbers. Used by OSINT investigators and researchers; a quick caller-identification lookup for AU numbers. (free, proprietary)
Have I Been Zucked?	—	—	—	— Free service checking whether an email appears in Facebook breach data. Used by OSINT researchers and privacy-conscious users; a quick breach-exposure check. (free, proprietary)
Find Instagram User ID	—	—	—	— Web tool that resolves an Instagram username to its numeric user ID. Used by OSINT investigators and social media researchers; a quick lookup utility for pivoting across platforms. (free, proprietary)
Instagram User ID	—	—	—	— Web tool that converts an Instagram username into its numeric user ID. Used by OSINT investigators and social media analysts; a simple lookup aid for cross-referencing accounts. (free, proprietary)

instalooter	—	—	—	— Python library and CLI that downloads media from Instagram profiles without an API key. Used by OSINT investigators and archivists; a scriptable scraper for collecting public profile content.
Telegago	—	—	—	— Google Custom Search Engine that queries indexed Telegram content for keywords. Used by OSINT investigators and researchers; a free search interface for surfacing public Telegram material. (free, proprietary)
Telegram Search	—	—	—	— Google Custom Search Engine that searches indexed Telegram posts for terms. Used by OSINT investigators and journalists; a free interface for finding public Telegram content. (free, proprietary)
Telegram Search. Search for posts	—	—	—	— TGStat search lets users find Telegram posts and channels by keyword. Used by OSINT investigators and journalists; a free analytics search for public Telegram content. (free tier)
Lyzem Blog	—	—	—	— Free search engine that indexes public Telegram posts and channels by keyword. Used by OSINT investigators and researchers; a web search for surfacing Telegram content. (free, proprietary)
TIKTOK Search Engine	—	—	—	— Google Custom Search Engine that indexes TikTok pages for keyword queries. Used by OSINT investigators and researchers; a free search interface for public TikTok content. (free, proprietary)
Steam Community :: Search	—	—	—	— Official Steam community search for locating user profiles by name. Used by investigators and gamers; a verified platform search for identifying Steam accounts. (free, proprietary)
Steam ID Finder	—	—	—	— Web tool that resolves a Steam ID to its profile data and links. Used by OSINT investigators and gamers; a lookup utility for mapping Steam identifiers to accounts. (free, proprietary)
Google Images	—	—	—	— Google reverse image search that finds where photos appear online. Used by OSINT investigators and researchers; a widely used image search for tracing photo origins. (free, proprietary)
Yandex Images	—	—	—	— Yandex reverse image search with strong face and photo matching. Used by OSINT investigators and researchers; a powerful free image search for identifying people and places. (free, proprietary)
Bing Images	—	—	—	— Bing reverse image search that returns live visual matches for uploaded photos. Used by OSINT investigators and researchers; a free image search for tracing photo sources. (free, proprietary)
See it, search it	—	—	—	— Bing visual search that finds live image matches from uploaded pictures. Used by OSINT investigators and researchers; a free tool for tracing images online. (free, proprietary)
Images Search Engine	—	—	—	— Google Custom Search Engine that performs live image searches across indexed sources. Used by OSINT investigators and researchers; a free interface for image discovery. (free, proprietary)
TinEye	—	—	—	— Reverse image search engine that finds where images appear online. Used by OSINT investigators and researchers; a free tier for tracing photo origins and reuse. (free tier)
Baidu	—	—	—	— Baidu reverse image search that returns live visual matches for uploaded photos. Used by OSINT investigators and researchers; a free image search for tracing photos. (free, proprietary)
Photo Album Finder	—	—	—	— Google Custom Search Engine that finds public photo albums by keyword. Used by OSINT investigators and researchers; a free search for locating shared image collections. (free, proprietary)
Pictriev	—	—	—	— Face-recognition reverse search that returns matching faces from uploaded photos. Used by OSINT investigators and researchers; a free facial search for identifying people. (free, proprietary)
Ethereum Block Explorer	—	—	—	— Etherscan block explorer with a free API for Ethereum address and transaction data. Used by blockchain investigators and analysts; a free lookup for tracing on-chain activity. (free tier)
Blockchain Explorer	—	—	—	— Blockchain.com explorer for looking up Bitcoin and Ethereum addresses and transactions. Used by investigators and analysts; a free tool for tracing cryptocurrency activity. (free, proprietary)

Blockcypher	—	—	—	— BlockCypher explorer and API for querying blockchain addresses and transactions. Used by blockchain investigators and developers; a free lookup for tracing crypto activity. (free tier)
SoChain	—	—	—	— SoChain blockchain explorer and API for querying addresses and transactions. Used by investigators and developers; a free lookup for tracing cryptocurrency activity. (free tier)
ICIJ Offshore Leaks Database	—	—	—	— ICIJ searchable database of leaked offshore records on people and companies. Used by investigative journalists and researchers; a free resource for tracing offshore entities. (free, proprietary)
Personal Data Leak Checker	—	—	—	— Cybernews tool that checks an email against known data breaches. Used by investigators and privacy-conscious users; a free lookup for breach exposure. (free, proprietary)
Leakedpassword.com	—	—	—	— Web tool that checks whether a password appears in known leak datasets. Used by privacy-conscious users and investigators; a free lookup for compromised credentials. (free, proprietary)
Ashley Madison hacked email che…	—	—	—	— Web checker that tests an email against the Ashley Madison breach dump. Used by investigators and researchers; a free lookup for breach exposure. (free, proprietary)
Lullar	—	—	—	— People search that looks up an email, username, or name across many sites. Used by OSINT investigators and researchers; a free lookup for tracing online identities. (free, proprietary)
EXPERTE Email Finder	—	—	—	— Tool that generates email permutations and validates them via SMTP checks. Used by OSINT investigators and recruiters; a free utility for finding email addresses. (free tier)
NumVerify	—	—	—	— API that validates phone numbers and returns carrier and location data. Used by developers and investigators; a free tier for phone number verification. (free tier)
