Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects; the full inventory keeps every curated entry.

Part of **Awesome Cyber Security Heaven** — 438 curated free tools across 14 realms.

REALM BRIEF

The professional offensive toolkit for authorized engagements, red-team exercises and training labs — the weapons every pentester reaches for first.

FIELD INTELLIGENCE (AI-ASSISTED)

The Armory's offensive security toolset shows clear maturity: 95% of its 40 free tools are hosted on GitHub, with 34 receiving code pushes in 2026, indicating active maintenance. Its top five tools—Metasploit, sqlmap, Nuclei, masscan, MobSF—hold 158,100 combined stars, a distribution that reflects sustained demand for foundational penetration testing, web vulnerability scanning, network mapping, and mobile security tools. A notable trend is the consolidation of bug bounty and pentesting workflows around Nuclei, which has grown 12% in stars since 2025, as teams adopt its template-based scanning to standardize vulnerability detection across environments.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
