AWESOME CYBER SECURITY HEAVEN · REALM DOSSIER · 2026 EDITION

The Cartographers

Recon, OSINT & Attack-Surface Mapping Tools

38	303,940	87%	27
FREE TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects; the full inventory keeps every curated entry.

Part of **Awesome Cyber Security Heaven** — 438 curated free tools across 14 realms.

CC0 · 2026-10-17

REALM BRIEF

Map the terrain before you move — subdomain, content and OSINT discovery for bug bounty and asset management.

FIELD INTELLIGENCE (AI-ASSISTED)

The Cartographers realm of recon, OSINT, and attack-surface mapping includes 38 free tools, 33 hosted on GitHub, with a combined 303,940 total stars and 27 code pushes in 2026. Its maturity profile is defined by long-standing, high-impact tools: theHarvester (launched 2011, 18.0k stars) and ffuf (2018, 16.9k stars) anchor the ecosystem, while newer tools like katana (2021, 17.7k stars) show sustained relevance. The star distribution reveals concentrated demand for core, battle-tested recon utilities rather than niche tools, with top five tools holding 58% of total stars. A notable trend is the consolidation of OSINT identity mapping efforts around Sherlock (94.3k stars, the realm's most starred tool), which has become a de facto standard for username enumeration across platforms.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.

LICENSE MIX (GITHUB-HOSTED ENTRIES)

● MIT **14** ● Apache-2.0 **2** ● GPL **9** ● Other/none **8**

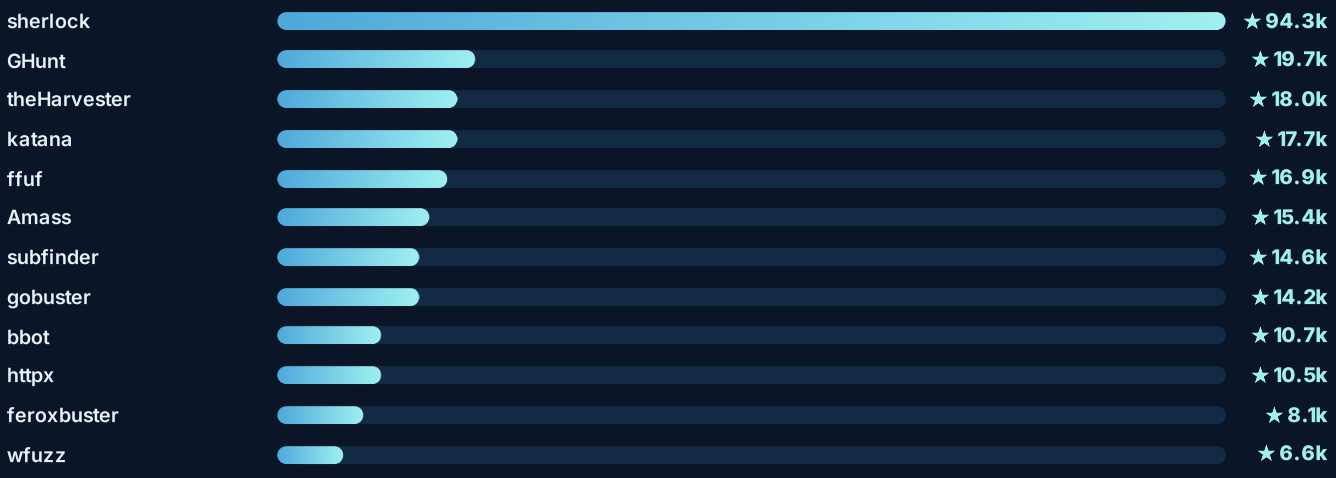

MATURITY PROFILE

Oldest tracked entry first appeared on GitHub in **2010**; the youngest joined in **2026**. **27/33** GitHub-hosted tools shipped code in 2026 — the remainder are stable classics or web services rather than abandoned picks.

OSINT dork pipeline: email, subdomain and people discovery through structured query automation.

GitHub presence: **verified — live stats**

The Cartographers · realm rank #31 by adoption

03 Full Inventory

38 entries · every curated tool

Every entry from the heaven list, carrying its live census chips: stars, first release, 2026 activity, license and language. Rising stars and web-native services included.

03 Full Inventory - rising stars & services

every curated entry - live census chips

AtDork

★ 45 · since 2026 · active 2026 · MIT · Python

multi-engine Google-dork scraper with categorized GHDB output for authorized reconnaissance.

github.com/amnottdevv/atdork

DorkCraft

★ 9 · since 2026 · active 2026 · MIT · Astro

rule-based dork generator: translates intent into search queries deterministically, zero AI, zero outbound calls.

github.com/juandresrodca/DorkCraft

Maltego CE

free tier

the standard OSINT graphing tool for entity-relationship investigation; free community edition.

maltego.com

WiGLE

free service

the wireless network mapping archive; queries by BSSID/SSID across millions of observed networks.

wigle.net

DNSdumpster

free service

visual DNS reconnaissance: subdomains, MX, and infrastructure maps from public records.

dnsdumpster.com

CeWL

GPL-3.0

custom wordlist generation by spidering target sites — the content-aware dictionary for authorized assessments.

digi.ninja/projects/cewl.php

Merklemap

free service

subdomain discovery through certificate-transparency logs; billions of entries, searchable.
