FIELD INTELLIGENCE (AI-ASSISTED)

This curated collection of 47 free blue team, SOC, and DFIR tools shows a mature, well-established field, with 46 hosted on GitHub and a combined 224,143 total stars, 42 of which received code pushes in 2026. The star distribution reflects sustained community trust: osquery (23.7k stars, 2014) leads, followed by Wazuh (17.3k, 2015), Atomic Red Team (12.7k, 2017), Sigma (11.3k, 2016), and awesome-honeypots (10.6k, 2015), all built for core defensive workflows. A notable trend is consolidation around open-source frameworks that standardize detection engineering and threat simulation, with Sigma's widespread adoption as a universal signature language driving cross-tool interoperability across the ecosystem.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
