47 tools · Part of Awesome Cyber Security Heaven — 1435 curated free tools across 14 realms · Data verified 2026-11-06 (re-verified monthly)

CURATOR'S NOTES

Feeds, frameworks and enrichment for the SOC's morning routine. Threat-intel platforms, IOC pipelines and detection-as-data. Most entries here are pipelines rather than point tools — chaining them is the whole game.

MAINTENANCE SNAPSHOT (2026-11-06)

- **Active in the last 30 days:** 12 of 18 tracked GitHub repos (67%)
- **Quiet classics (no push in 12+ months, still listed):** none
- **Earliest entries:** SpiderFoot (2012), cve-search (2012), MISP (2013)

FLAGSHIP PICKS — THE HEAVYWEIGHTS

TOOL	★ STARS	CREATED	LAST PUSH	WHAT IT DOES
SpiderFoot	24.2k	2012	2026-04-13	SpiderFoot automates OSINT for threat intelligence and mapping your attack surface.
OpenCTI	10.2k	2018	2026-11-01 ✅	Open Cyber Threat Intelligence Platform
MISP	6.6k	2013	2026-11-01 ✅	MISP (core software) - Open Source Threat Intelligence and Sharing Platform
IntelOwl	4.8k	2019	2026-10-31 ✅	IntelOwl: manage your Threat Intelligence at scale
firehol/blocklist-ipsets	4k	2015	2026-10-31 ✅	ipsets dynamically updated with firehol's update-ipsets.sh script
Uncover	3.1k	2022	2026-10-27 ✅	Quickly discover exposed hosts on the internet using multiple search engines.

Full inventory — 47 curated tools · ranked by GitHub adoption · 2026-11-06 census · non-GitHub tools listed without stars

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
SpiderFoot	24.2k	2012	2026-04-13	— open-source OSINT automation with 200+ data sources; attack-surface and exposure monitoring out of the box. Used by OSINT investigators automating recon; the free self-hosted version of the SpiderFoot HX service.
OpenCTI	10.2k	2018	2026-11-01 ✅	— threat-intel knowledge graph built on STIX2; analyst-first investigation dashboards instead of raw feeds. Used by CTI teams building knowledge graphs of threat data; the open-source alternative to commercial intel platforms with graph UIs.
MISP	6.6k	2013	2026-11-01 ✅	— the de-facto open threat-sharing platform: events, attributes, galaxies and thousands of community feeds. Used by CERTs and threat-intel teams worldwide; the leading open-source alternative to commercial threat-intelligence platforms like Recorded Future and ThreatQ. (AGPL-3.0)
IntelOwl	4.8k	2019	2026-10-31 ✅	— bulk-analyze observables across 100+ online services from one API and web UI. Used by SOC analysts enriching observables in bulk; the open-source alternative to commercial one-click threat-inquiry APIs. (AGPL-3.0)
EQGRP	4.2k	2017	2017-05-24 ⏳	— Decrypted content of the EQGRP auction file attributed to offensive tooling. Used by researchers and defenders; a historical artifact for threat analysis.
firehol/blocklist-ipsets	4k	2015	2026-10-31 ✅	— aggregated, daily-updated IP blocklists (attacks, spam, abuse) ready for iptables/fail2ban; check each list's own license before redistribution. Used by firewall admins feeding blocklists; the community-maintained alternative to commercial IP-reputation feeds.

Uncover	3.1k	2022	2026-10-27 ✅	— query exposed services across Shodan, Censys and friends in one sweep — the instant exposure check. Used by recon teams querying exposure across search engines at once; the free aggregator for Shodan-style lookups.
OpenCVE	2.9k	2020	2026-10-26 ✅	— self-hosted vulnerability intelligence platform: indexes CVEs and notifies on the products and keywords you follow. Used by security teams tracking new CVEs for their asset inventory; the self-hosted alternative to commercial CVE feeds. (Apache-2.0)
cve-search	2.7k	2012	2026-10-13 ✅	— self-hosted CVE/CPE database in MongoDB with web UI, API and CLI. Used by orgs (incl. CIRCL's former public CVE service) to run local, rate-limit-free vulnerability lookups; strict/lax CPE matching, 14 yrs of maintenance. (AGPL-3.0)
Yeti	2k	2015	2026-10-28 ✅	— organize your threat intel: observables, indicators and TTPs in one searchable, API-first platform. Used by CTI analysts organizing indicators and TTPs; the open-source threat-intel tracker for teams without commercial TIP budgets.
IntelMQ	1.1k	2014	2026-04-28	— the feed plumber's dream: collect, normalize and route threat-intel feeds from hundreds of sources into your stack. Used by national CERTs automating feed ingestion; the open-source alternative to commercial intel-pipeline tooling. (AGPL-3.0)
ThreatHunting-Keywords	683	2023	2025-08-04 ⏳	— Massive database of keywords, artifacts, and patterns organized by offensive tool, ATT&CK technique, and log type with ready queries. Used by threat hunters; a practical detection keyword reference.
RansomLook	682	2022	2026-10-30 ✅	— open ransomware-group leak-site tracker with historical victim data (see also the live stats at ransomware.live). Used by CTI analysts tracking ransomware leak sites; the free watchtower the commercial feeds also scrape. (GPL-3.0)
CVE2CAPEC	322	2024	2026-11-01 ✅	— Maps CVEs through CWE to CAPEC, MITRE ATT&CK, D3FEND and ATLAS techniques with a daily-updated database; showcased at BlackHat Europe 2025 Arsenal. Used by threat-intel analysts turning CVE lists into technique-level attack context; the free CVE-to-technique enrichment engine.. (GPL-3.0)
Trust Scan	5	2025	2026-03-25 ⏳	— URL security scanner combining threat intelligence feeds like URLhaus, PhishTank and Spamhaus with 40+ scam and phishing pattern checks. Used by defenders and analysts; a practical phishing triage helper. (MIT)
CrawlerScope	1	2026	2026-11-01 ✅	— operator-published crawler and AI-bot CIDR dataset for bot attribution. Used by defenders verifying whether traffic is a legitimate crawler; the public dataset for bot-network attribution. (CC0)
http-detection-agent	1	2026	2026-10-28 ✅	— traffic anomaly detection for the blue team: labels HTTP datasets without shipping them off-box. Used by recon pipelines fingerprinting web servers at scale; a focused open utility for asset inventories. (MIT)
threat-intel (GitHub)	0	2025	2025-11-25 ⏳	— Real-time threat intelligence aggregation and visualization platform with IOC tracking, actor profiling and Elasticsearch/Kibana dashboards. Used by SOC analysts and CTI teams; an open-source aggregation stack. (MIT)
Emerging Threats Open	—	—	—	— the open Suricata/Snort rule feed from Proofpoint; thousands of community-maintained detection rules. Used by Suricata and Snort defenders everywhere; the free ruleset that the commercial ET Pro subscription extends. (free feed)
ICHI — Internet Cyber Health Index	—	—	—	— free, source-transparent daily barometer of internet cyber health, aggregating threat intelligence, security news, and telemetry from 20+ named public sources. Used by SOC analysts and security researchers for daily situational awareness of global cyber conditions; the free daily-refresh alternative to scattered vendor intelligence portals. (free service)
Malpedia	—	—	—	— curated malware encyclopedia: families, actors, papers and sample references for researchers. Used by malware researchers as the reference index of families and papers; the free, vendor-neutral encyclopedia.
MITRE ATT&CK	—	—	—	— the adversary tactics & techniques knowledge base that the entire industry maps detections and emulations against. Used by red teams, defenders and vendors as the shared language of adversary behavior; the free framework the whole industry maps to.
NetworkMiner	—	—	—	— passive network-forensics analyzer: extracts files, credentials and sessions from recorded traffic without touching the live network. Used by DFIR analysts for passive network forensics and artifact extraction; the free alternative to commercial network-forensics suites. (free, proprietary)

vx-underground	—	—	—	— the malware corpus and INT report archive; free, massive and respected across the research community. Used by malware researchers studying live collections; the free sample and paper archive with no commercial gate. (free service)
ZDI advisories	—	—	—	— published zero-day advisories from the Zero Day Initiative; the disclosure record for enterprise-software flaws. Used by patch-priority teams tracking pre-disclosure zero-days; the free advisory stream competing with vendor feeds. (free service)
WhiteIntel	—	—	—	— Dark web monitoring service tracking exposed data and credentials across underground sources. Used by defenders and organizations; a free-tier early warning for leaked credentials. (free tier)
ThreatFox	—	—	—	— Free community IOC platform by abuse.ch for searching domains, IPs and file hashes against known malware infrastructure. Used by threat analysts and SOC teams; a constantly updated IOC lookup. (free, proprietary)
IBM X-Force Exchange	—	—	—	— Free community threat intelligence research platform offering IOC search and malware analysis data. Used by CTI analysts and researchers; a long-standing free exchange for threat data. (free tier)
VulnWatch	—	—	—	— Cybersecurity platform dedicated to tracking vulnerabilities, monitoring emerging security threats, and providing insights. Used by security analysts and defenders; a free vulnerability and threat tracking service. (free, proprietary)
MITRE ATT&CK Navigator	—	—	—	— Coverage mapping tool visualizing detection and hunting coverage against the ATT&CK matrix, with an MCP server for AI assistance. Used by defenders; the standard ATT&CK coverage mapper.
CrowdStrike Blog	—	—	—	— CrowdStrike's vendor blog with investigative research on threats, vulnerabilities, and APT groups; used by defenders for threat intelligence. (free, proprietary)
Google Project Zero	—	—	—	— Google Project Zero's blog publishing deep technical analyses of zero-day vulnerabilities and exploitation techniques; read by elite researchers. (free, proprietary)
Mandiant Blog	—	—	—	— Mandiant's research blog providing frontline threat intelligence and incident response insights; used by defenders tracking major breaches. (free, proprietary)
Check Point Research	—	—	—	— Check Point Research blog covering APT campaigns, vulnerability discoveries, and attack trends; read by threat intelligence analysts. (free, proprietary)
Cisco Talos Intelligence	—	—	—	— Cisco Talos threat research blog covering vulnerabilities, malware campaigns, and threat actor activity; used by defenders for intelligence. (free, proprietary)
Fortinet Threat Research	—	—	—	— FortiGuard Labs research blog covering emerging threats, malware analysis, and vulnerability intelligence; read by security operations teams. (free, proprietary)
Securelist (Kaspersky)	—	—	—	— Kaspersky's research blog with deep malware analysis, APT tracking, and threat intelligence; used by researchers and defenders. (free, proprietary)
Malwarebytes Labs	—	—	—	— Malwarebytes Labs blog covering malware research, threat analysis, and security news; read by practitioners tracking emerging threats. (free, proprietary)
SentinelLabs	—	—	—	— SentinelOne's research division publishing threat intelligence, malware analysis, and offensive security research; used by defenders and researchers. (free, proprietary)
CISA Advisories	—	—	—	— CISA's official alerts, advisories, and Known Exploited Vulnerabilities catalog; used by defenders worldwide to prioritize patching. (free, proprietary)
CERT-FR (ANSSI)	—	—	—	— French national cybersecurity agency's advisories and alerts on vulnerabilities and threats; used by defenders tracking European intelligence. (free, proprietary)
Zero Day Initiative (ZDI)	—	—	—	— Trend Micro's bug bounty program publishing vulnerability advisories and zero-day disclosures; used by defenders tracking unpatched flaws. (free, proprietary)
Google Online Security Blog	—	—	—	— Google's security team blog covering vulnerabilities, security features, and threat research; read by practitioners and researchers. (free, proprietary)
SANS Internet Storm Center	—	—	—	— Daily diary of security incidents and handler insights from SANS. Used by defenders and threat analysts; a trusted community resource for real-time threat awareness.

The Record by Recorded Future	—	—	—	— Intelligence-driven reporting on attackers, vulnerabilities, and global security incidents backed by Recorded Future. Used by defenders and analysts; a reliable news source for threat awareness.
NSFOCUS	—	—	—	— NSFOCUS threat intelligence portal providing IOC and threat data. Used by SOC analysts and defenders; a vendor threat intel resource. (free tier)
ssltest	—	—	—	— Online service performing deep analysis of SSL web server configuration. Used by sysadmins and security testers; the standard TLS configuration grader. (free, proprietary)
