🤖 AWESOME CYBER SECURITY HEAVEN · REALM DOSSIER · 2026 EDITION

The Oracle's Domain

AI Security & LLM Security Tools

6	22,301	83%	5
FREE TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

Intro: Secure the new surface — guardrails, model-file safety and signing for AI-powered applications.

Deep-research edition. Every entry re-verified and enriched with live GitHub statistics (stars, first release, last push, license, language) pulled 2026-10-17 via the GitHub API, plus per-realm field intelligence. Tool profiles rank the realm's most-adopted projects and note who uses each tool and the commercial product it replaces; the full inventory keeps every curated entry.

Part of Awesome Cyber Security Heaven — **444 curated free tools across 14 realms**.

REALM BRIEF

Intro: Secure the new surface — guardrails, model-file safety and signing for AI-powered applications.

FIELD INTELLIGENCE (AI-ASSISTED)

The Oracle's Domain AI and LLM security realm includes 6 curated tools, with 5 hosted on GitHub representing 83% of the collection, all of which saw code pushes in 2026 indicating active maintenance. The oldest entry dates to December 21, 2015, establishing a multi-year maturity baseline for the curated toolset. Adoption is heavily concentrated in the top three tools, which account for 21,200 of the combined 22,301 stars, leaving remaining tools with far lower visibility. The entire toolset is written exclusively in Python, with a license mix split between Apache-2.0, MIT, and other or no licenses, and no quiet classics with no 2026 code pushes to signal stagnant projects.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.

02 Tool Profiles — the heavyweights

full-page dossiers · ranked by adoption

Each heavyweight gets a full dossier: live GitHub census (stars, forks, first-release year, last push, license, language), the project's own claim, our curator's note, **who uses it and which commercial product it replaces**, and its star weight against the realm's #1.

Profiles are ordered by GitHub adoption (stars). Non-GitHub entries follow, alphabetically. Flagship marks the realm's top 8 by stars.
