ABOUT THIS REALM

The Sentinel Ops — Blue Team, SOC & DFIR Tools

Detect, hunt, forensicate — the defensive operations toolkit.

The largest realm — detection engineering, ATT&CK-aligned datasets, SIEM labs and DFIR toolkits. The fingerprinting standards (JA3, HASSH) live here: archived upstream, still canonical, still cited in nearly every detection paper.

- **Active in the last 30 days:** 26 of 46 tracked GitHub repos (57%)
- **Quiet classics (no push in 2+ years, still the standard):** sysmon-config, Revoke-Obfuscation, DeepBlueCLI, HELK
- **Youngest entries:** The Sleuth Kit (2011), Arkime (2012), Zeek (2012)

THE COLLECTION

All 47 tools — with live facts
