CURATOR'S NOTES

The zero-AI AI-security realm — guardrails, model-file safety, signing and the shared risk taxonomies. Tools here defend AI surfaces without themselves needing an LLM key; the AI-dependent assistants and copilots live one realm over, in The AI Forge.

MAINTENANCE SNAPSHOT (2026-10-22)

- Active in the last 30 days: 7 of 8 tracked GitHub repos (88%)
- Earliest entries: Awesome Threat Intelligence (2015), NeMo Guardrails (2023), modelscan (2023)

Part of Awesome Cyber Security Heaven — 520 curated free tools across 14 realms

FLAGSHIP PICKS — THE HEAVYWEIGHTS

TOOL	★ STARS	CREATED	LAST PUSH	WHAT IT DOES
CL4R1T4S	51.4k	2025	2026-09-22 ✅	LEAKED SYSTEM PROMPTS FOR CHATGPT, CLAUDE, GEMINI, GROK, PERPLEXITY, CURSOR, LOVABLE, REPLIT, AND MORE! - AI S...
Awesome Threat Intelligence	10.8k	2015	2026-05-31	A curated list of Awesome Threat Intelligence resources
NeMo Guardrails	7.3k	2023	2026-10-22 ✅	NeMo Guardrails is an open-source toolkit for easily adding programmable guardrails to LLM-based conversationa...
modelscan	787	2023	2026-09-28 ✅	Protection against Model Serialization Attacks
guardana	252	2026	2026-10-21 ✅	Open-source AI security verification for model artifacts, live endpoints, MCP servers, and recorded agent trac...
model-transparency	249	2023	2026-10-19 ✅	Supply chain security for ML

FULL INVENTORY — 9 CURATED TOOLS

ranked by GitHub adoption · 2026-10-22 census · non-GitHub entries listed last

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
CL4R1T4S	51.4k	2025	2026-09-22 ✅	— the community archive of leaked and reverse-engineered system prompts from ChatGPT, Claude, Gemini, Grok, Cursor and other major models — provenance-tagged and continuously updated. Used by AI governance teams auditing prompt transparency and researchers studying instruction leakage; the reference corpus for prompt-disclosure audits. (AGPL-3.0, copyleft)
Awesome Threat Intelligence	10.8k	2015	2026-05-31	— the curated threat-intelligence tools and platform index. Used by CTI practitioners assembling sources and tools. (Apache-2.0, curated list)

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
NeMo Guardrails	7.3k	2023	2026-10-22 ✅	— programmable guardrail layer for LLM apps: input/output rails, dialog safety, topic control. Used by AI engineers adding safety rails to LLM apps; NVIDIA's open-source guardrail toolkit for production deployments.
modelscan	787	2023	2026-09-28 ✅	— scan model files (pickle, safetensors) for malicious code before you load them — supply-chain defense for ML. Used by AI security teams scanning model files for pickle and format exploits; the open-source scanner for ML supply chains.
HackAgent	529	2025	2026-10-21 ✅	— red-team toolkit for AI models and agents: actively tests jailbreaks, prompt injection and tool misuse, then scores each reply with judge models for measured per-attack success rates. Used by AI security teams quantifying agent attack surface; the open-source AI red-teaming harness with built-in scoring. (Apache-2.0)
guardana	252	2026	2026-10-21 ✅	— AI-security verification platform: 58 deterministic rules across model artifacts, live LLM, MCP and A2A endpoints and OTel traces, mapped to OWASP LLM/Agentic/MCP, ATLAS and NIST. Used by AI security teams auditing model stacks deterministically; the pre-1.0 release-candidate platform worth tracking. (Apache-2.0)
model-transparency	249	2023	2026-10-19 ✅	— signing for ML models: verify exactly which model you are deploying. Used by AI governance teams documenting model provenance; the AI Alliance's open standard for model transparency labels. (Apache-2.0)
Penthera	53	2026	2026-10-22 ✅	— offline rule-based security agent that audits app code, dependencies and AI coding tooling (Claude Code, Cursor, MCP servers) with deterministic fixes applied to a local branch — zero cloud calls. Used by teams hardening AI-assisted codebases with NIS2/CRA-ready evidence; the self-hosted AI-tooling auditor with SARIF output. (MIT)
OWASP Top 10 for LLM Applications	—	—	—	— the standard risk taxonomy for LLM apps; the shared language for AI threat modeling. Used by AppSec teams auditing LLM systems; the industry-standard risk list everyone maps AI security to.
