ABOUT THIS REALM

The AI Forge — AI-Dependent Security Tools

Security tools with an LLM as the engine — red-team agents, pentest copilots and scenario

The AI-labour realm — security tools that put an LLM to work: red-team agents, pentest copilots, exercise generators. Every entry needs an LLM API key to function, which we mark as a feature, not a paywall — the tool is free, the brain is rented. We watch this realm closest of all: AI tooling churns faster than any other category on the list.

- **Active in the last 30 days:** 8 of 9 tracked GitHub repos (89%)
- **Youngest entries:** PentestGPT (2023), promptfoo (2023), garak (2023)

THE COLLECTION

All 9 tools — with live facts

Every entry below was checked against the GitHub API on 2026-10-15: star counts, project ages, last-push dates and licenses are re-snapshotted on every monthly verification pass. Flagship picks carry the **FLAGSHIP** badge — the tools this realm is built around. Everything is free, free-tier or open source: no paywalls, no SaaS wrappers.
