ABOUT THIS REALM

The Foundry — DevSecOps, Cloud & Container Security Tools

Shift security left — SAST, SCA, IaC, SBOM and container scanning that fit the pipeline.

The pipeline guardians — SAST, dependency scanning, IaC misconfig audits, container hardening. This realm moves fastest of all: CI/CD attack research regularly rewrites the ground rules here.

- **Active in the last 30 days:** 17 of 29 tracked GitHub repos (59%)
- **Archived upstream (kept — still reference-quality):** [OWASP Dependency-Check](https://github.com/jeremylong/DependencyCheck)
- **Quiet classics (no push in 2+ years, still the standard):** kube-hunter, sobelow, logdissect, Awesome ICS Security, Awesome Container Security
- **Youngest entries:** cppcheck (2009), Brakeman (2010), Dependency-Track (2013)
