CURATED TOOLS	COMBINED STARS	ON GITHUB	ACTIVE IN 2026

2026 EDITION · DEEP-RESEARCH DOSSIER

Live GitHub census pulled 2026-10-17 · part of 438 curated free tools across 14 realms

CC0 · 2026-10-17

6	4	22.3k	4	3.2k	2015
CURATED TOOLS	ON GITHUB	COMBINED STARS	PUSHED 2026	MEDIAN STARS	OLDEST ENTRY

REALM BRIEF

Secure the new surface — guardrails, model-file safety and signing for AI-powered applications.

The zero-AI AI-security realm — guardrails, model-file safety, signing and the shared risk taxonomies. Tools here defend AI surfaces without themselves needing an LLM key; the AI-dependent assistants and copilots live one realm over, in The AI Forge.

FIELD INTELLIGENCE · AI-ASSISTED

The Oracle's Domain AI and LLM security tools show a clear maturity split: the 10.7k-star Awesome Threat Intelligence (launched 2015) is an established, long-running resource, while the remaining five tools (launched 2023) are newer, with NeMo Guardrails leading at 7.3k stars. The star distribution signals growing industry focus on LLM-specific guardrails and model safety, as newer tools outpace smaller niche projects. A notable trend is consolidation around NeMo Guardrails as the most widely adopted open-source LLM security framework among the 2023-launched tools.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.

LICENSE MIX · GITHUB-HOSTED ENTRIES

MATURITY PROFILE

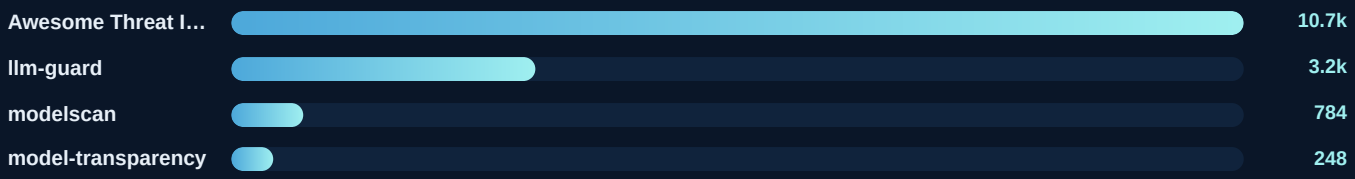

Oldest tracked entry first appeared on GitHub in **2015**; the youngest joined in **2023**. 4 of 4 GitHub-hosted tools shipped code in 2026 — the rest are stable classics or web services, not abandoned picks.

Median project age signals a battle-tested realm; recent arrivals mark where the community is investing next.

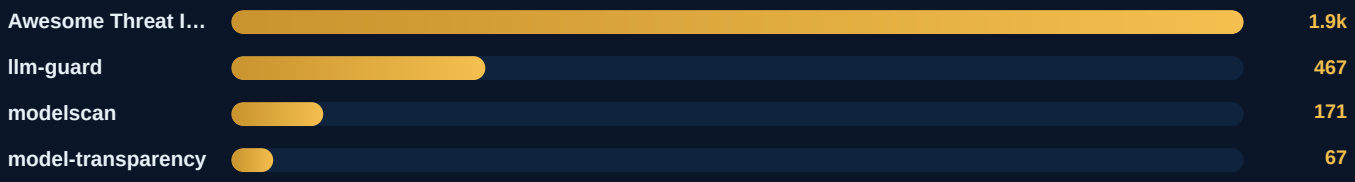

SNAPSHOT

- Active in the last 30 days: 2 of 5 tracked GitHub repos (40%)
- Archived upstream (kept — still reference-quality): [llm-guard](https://github.com/protectai/llm-guard)
- Youngest entries: Awesome Threat Intelligence (2015), NeMo Guardrails (2023), modelscan (2023)

TOP TOOLS BY GITHUB STARS

Awesome Threat Intelligence	2015

QUIET CLASSICS — STILL THE STANDARD

None — every entry pushed code recently.

Tools with no recent push that remain the community's default reference for their job.

LANGUAGE MIX — GITHUB-HOSTED ENTRIES

CREATION ERAS — WHEN THIS REALM WAS BUILT

First-seen on GitHub, bucketed by decade.

HOW TO READ A DOSSIER

Each heavyweight gets a full dossier: live GitHub census (stars, forks, first-release year, last push, license, language), the project's own claim, our curator's note, a signal check, and its star weight against the realm's #1. Numbers are pulled straight from the GitHub API on 2026-10-17 — no self-reported marketing figures, only what the platforms show.

THE CENSUS METRICS — WHAT EACH NUMBER MEANS

★ GitHub stars
Community trust signal — how many developers bookmarked the repo.

Forks · reuse
Real-world deployment signal — forks mean people build on it.

First developed
Year the repo first appeared on GitHub — the project's true age.

Last push
Most recent code push — the project's heartbeat.

License
What you may legally do with it. MIT/Apache = permissive.

2026 momentum
Shipped code during 2026 — active development, not abandonware.

METHODOLOGY & PROVENANCE

Census pulled via the GitHub REST API on 2026-10-17; realm curation and curator's notes by the Awesome Cyber Security Heaven maintainers; field-intelligence summaries synthesized by seed-2-0-mini from the same census. Everything reproducible — every figure traces back to a public API response. Released under CC0.
