REALM BRIEF

Public data, lawful purpose — OSINT frameworks, people-search, breach lookups, site monitoring and archive history for investigators, defenders and researchers. These tools only surface what is already public; use them for authorized investigations, defense and education only — never to stalk, harass or dox anyone.

FIELD INTELLIGENCE (AI-ASSISTED)

The Shadow Bureau's OSINT toolset shows strong maturity: 29 free tools, 22 hosted on GitHub, with combined 189,398 stars and 18 code pushes in 2026, indicating active maintenance. Star distribution reveals high demand for identity-focused OSINT, with Maigret and Holehe leading at 39.1k and 15.2k stars respectively, while web-check and changedetection.io (35.1k each) reflect growing interest in web monitoring. A notable trend is consolidation of niche OSINT functions into versatile tools, seen in changedetection.io's adoption for tracking public web changes across use cases.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
