REALM BRIEF

The everyday carry — decoding, proxying, dissecting and transforming anything the job throws at you.

FIELD INTELLIGENCE (AI-ASSISTED)

The Workshop's cybersecurity utility ecosystem shows clear maturity: 44 free tools, 35 hosted on GitHub, with 553,245 combined stars and 31 active code pushes in 2026. Star distribution reveals a well-established field, with legacy tools like mitmproxy (45.7k stars, launched 2010) and newer entries like ImHex (55.3k stars, launched 2020) holding comparable traction, while Ghidra's 89.5k stars anchor the reverse engineering segment. A notable trend is consolidation of reverse engineering tooling around top-tier open-source options, with x64dbg and CyberChef also seeing sustained community investment alongside Ghidra.

Synthesized by seed-2-0-mini over the live census: stars, first-release years, push activity and project claims pulled from the GitHub API on 2026-10-17. Human-curated realm, AI-summarized numbers.
