CURATOR'S NOTES

Public data, lawful purpose — OSINT frameworks, people-search, breach lookups, site monitoring and archive history for investigators, defenders and researchers. These tools only surface what is already public; use them for authorized investigations, defense and education only — never to stalk, harass or dox anyone.

MAINTENANCE SNAPSHOT (2026-10-22)

- **Active in the last 30 days:** 21 of 32 tracked GitHub repos (66%)
- **Part of Awesome Cyber Security Heaven** — 509 curated free tools across 14 realms

FLAGSHIP PICKS — THE HEAVYWEIGHTS

TOOL	★ STARS	CREATED	LAST PUSH	WHAT IT DOES
maigret	39.3k	2020	2026-10-22 ✅	🕵️ Collect a dossier on a person by username from 6K websites
changedetection.io	35.2k	2021	2026-10-19 ✅	Best and simplest tool for website change detection, web page monitoring, and website change alerts. Perfect for trackin…
web-check	35.2k	2023	2026-10-21 ✅	🕵️ All-in-one OSINT tool for analysing any website
PhoneInfoga	18.2k	2018	2026-08-25	Information gathering framework for phone numbers
holehe	15.3k	2020	2024-09-10 ⏳	holehe allows you to check if the mail is used on different sites like twitter, instagram and will retrieve information…
Osintgram	15.1k	2019	2026-10-20 ✅	Osintgram is a OSINT tool on Instagram. It offers an interactive shell to perform analysis on Instagram account of any u…

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
maigret	39.3k	2020	2026-10-22 ✅	— builds a full dossier from a single username across thousands of sites; powerful people-OSINT — authorized investigations only. Used by OSINT investigators generating full username reports across platforms; the Sherlock successor with report output.
changedetection.io	35.2k	2021	2026-10-19 ✅	— self-hosted website change monitoring with selectors, visual diffs and dozens of notification targets. Used by investigators and ops teams monitoring pages for changes; the open-source alternative to commercial change-monitoring SaaS.
web-check	35.2k	2023	2026-10-21 ✅	— all-in-one website OSINT dashboard — DNS, headers, tech, ports, TLS, whois and more — self-hostable in one Docker pull. Used by bug hunters and defenders getting a full technical profile of any site in one page; the free all-in-one site analyzer.
PhoneInfoga	18.2k	2018	2026-08-25	— phone-number OSINT: carriers, reputation and footprint from public sources, no scraping of private data. Used by investigators profiling phone numbers from public sources; the standard free phone-OSINT scanner. (GPL-3.0)
holehe	15.3k	2020	2024-09-10 ⏳	— checks which sites an email is registered on via password-reset and account-exist flows; quiet upstream but still the standard. Used by investigators checking which services an email registered with; the free breach-recovery check used in authorized account reviews. (GPL-3.0)
Osintgram	15.1k	2019	2026-10-20 ✅	— interactive Instagram OSINT (followers, public emails/phones, geotags, posting patterns); requires an Instagram account — authorized research only. Used by investigators with authorized access profiling Instagram accounts; the open Instagram OSINT toolkit. (GPL-3.0)
Photon	13.3k	2018	2026-10-17 ✅	— fast OSINT crawler that rips a target apart for emails, social profiles, intel files and metadata, with exportable reports. Used by OSINT researchers crawling targets for emails, socials and intel; the fast open crawler for investigations. (GPL-3.0)
check-if-email-exists	10.2k	2017	2026-10-16 ✅	— verify an email address exists without sending any message: SMTP-level mailbox checks with disposable and catch-all detection, self-hostable or as a service. Used by investigators confirming a mailbox is real before deeper checks; the free verifier behind Reacher. (MIT)
gosearch	3.8k	2024	2026-10-21 ✅	— fast concurrent username enumeration across 190+ sites with category-filtered account discovery. Used by OSINT investigators mapping a person's account footprint quickly; the concurrent alternative to sherlock-class username hunts. (GPL-3.0)
waybackpack	3.2k	2016	2025-04-21 ⏳	— bulk-download a site's history from the Wayback Machine; the archivist's archive. Used by researchers downloading archived sites in bulk; the open downloader for Wayback Machine investigations. (MIT)
sn0int	2.6k	2018	2026-09-20	— semi-automatic OSINT framework with scriptable modules, its own package ecosystem and a database that remembers everything you've collected. Used by OSINT investigators scripting structured intel gathering; the semi-automatic OSINT framework for serious cases. (GPL-3.0)
Nipe	2.4k	2015	2026-09-13	— a tool to make your traffic pass through the Tor network; redirect the machine's egress for privacy. Used by researchers anonymizing tool traffic through Tor exit nodes; the open anonymity router for sanctioned research. (MIT)
Mitaka	1.9k	2018	2026-10-21 ✅	— IOC-pivot browser extension: search an IP/domain/hash across 30+ engines from the context menu. Used by analysts searching IOCs across 60+ services from the browser; the free browser extension for instant CTI lookups. (MIT)
socialscan	1.9k	2019	2026-10-20 ✅	— accurate email and username existence checks across major platforms by querying signup servers directly instead of scraping profile pages; quiet upstream but still accurate. Used by investigators verifying account existence with fewer false positives; the accuracy-first checker for email and username lookups. (MPL-2.0)
telegram-phone-number-checker	1.8k	2021	2026-08-17	— check which phone numbers are connected to Telegram accounts and pull usernames and names; needs your own Telegram session — authorized research only. Used by investigators with authorized Telegram access linking numbers to accounts; Bellingcat's open checker for sanctioned research. (MIT)

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
MailAccess	1.7k	2026	2026-10-19 ✅	— email-exposure toolkit that flags breach appearances and stealer-log presence for an address — authorized investigations only. Used by investigators during authorized account-recovery engagements to check email credential exposure; a focused checker for red-team and OSINT work.
whatsapp-osint	1.6k	2019	2026-10-17 ✅	— monitor WhatsApp online/offline presence and profile signals from a linked session for lawful, authorized investigations only. Used by investigators tracking activity patterns in sanctioned cases; the open WhatsApp presence monitor for lawful research. (MIT)
Taranis AI	1.2k	2023	2026-10-22 ✅	— OSINT gathering and enrichment platform for analysts; self-hostable with an AI-assist layer. Used by CTI teams gathering and briefing intel with AI assistance; the open-source alternative to commercial intel-briefing tools. (EUPL-1.2)
socid-extractor	1.1k	2019	2026-10-18 ✅	— the extraction engine behind Maigret: turn any profile URL into structured identifiers — internal user IDs, linked accounts and hidden page metadata. Used by OSINT investigators pivoting from one profile to linked identities; the maigret author's extractor for deep profile intelligence. (MIT)
GitFive	1k	2022	2025-10-04 ⏳	— GitHub account OSINT: reconstruct a user's footprint from commits, organizations, emails and repo activity to map identities and aliases. Used by investigators tracking GitHub identities across repositories; the deep GitHub profiler for authorized cases. (MPL-2.0)
opensquat	987	2020	2026-08-01	— watches newly-registered domains for typosquats and brand lookalikes, with free daily feeds. Used by brand-protection teams watching for newly registered lookalike domains; the free alternative to commercial domain-monitoring services. (GPL-3.0)
VoidAccess	907	2026	2026-10-21 ✅	— self-hosted dark-web monitoring platform for threat-intelligence teams. Used by bug hunters dorking for exposed panels and documents; the free web-search automation for recon. (MIT)
Seekr	886	2022	2026-06-16	— self-hosted keyless OSINT toolkit with a desktop-style web UI, person database and account cards. Used by investigators gathering and managing identifier lookups (email via Discord/Spotify/PGP keyservers, username discovery, GitHub→email) with zero API keys; plugin system, Docker/Nix. (GPL-3.0)
TOsint	876	2021	2026-09-30 ✅	— Telegram OSINT: user, channel and bot intelligence from public messaging data. Used by investigators mining Telegram accounts and groups from public data; the focused Telegram OSINT client. (GPL-3.0)
chiasmodon	703	2024	2025-05-10 ⏳	— domain-centric OSINT: pivot from one domain to emails, subdomains, ASN and related-asset intelligence across multiple sources. Used by investigators pivoting from domains, emails and IPs across OSINT sources; the open alternative to commercial attribution tooling.
cyberbro	695	2024	2026-10-19 ✅	— self-hosted IOC reputation station: paste URLs, IPs or hashes and get verdicts from dozens of engines on one page. Used by SOC analysts triaging indicators through multiple OSINT sources in one UI; the free aggregator for daily IOC lookups.
waybackpy	610	2020	2024-02-26 ⏳	— Python client and CLI for the Wayback Machine: search, save and diff archived snapshots from your own scripts; quiet upstream, works fine. Used by researchers scripting Wayback Machine lookups from Python and CLI; the open client for archive intelligence.
leaker	601	2025	2026-10-09 ✅	— one terminal command, ten public breach databases — passive checks for whether an email or domain appears in known leaks. Used by OSINT researchers searching breach corpora for exposed records; the free alternative to paid breach-search subscriptions.
Marple	333	2021	2026-10-14 ✅	— collect links to profiles by username through search engines, then analyze the results to surface related accounts across platforms. Used by OSINT investigators expanding one username into a full cross-platform profile set; the search-engine profile aggregator from the maigret author. (MIT)
IntelHub	123	2025	2026-10-01 ✅	— browser extension that runs OSINT analysis locally; no data leaves the analyst's machine. Used by analysts running quick multi-source OSINT lookups from the browser; the free aggregator extension for triage. (MIT)

TOOL	★ STARS	CREATED	LAST PUSH	LICENSE / TIER
tg-chat-dump	3	2026	2026-10-16 ✅	— archive public Telegram chats to SQLite for structured analysis. Used by researchers exporting Telegram chat history for analysis; the open dump utility for sanctioned investigations. (MIT)
Exposure-Check-OSINT	1	2026	2026-10-22 ✅	— self-hosted personal
aware-online	—	—	—	— OSINT training and tooling from the Dutch awareness school; free investigative resources. Used by OSINT learners building investigation skills; the free training resource behind many analyst onboarding paths. (free service)
HoneyLabs	—	—	—	— free per-IP honeypot-telemetry reports: see whether an address has been tripping sensors worldwide. Used by researchers studying deceptive-security techniques; the honeypot research project for defender experiments.
ip.thc.org	—	—	—	— free, keyless JSON API for reverse DNS, subdomain and CNAME lookups on any IP — the quick IP pivot. Used by analysts quickly checking IP reputation and attributes; the free no-frills lookup service.
LeakLens	—	—	—	— non-commercial breach registry with a keyless phone, email, username and password exposure audit API. Used by anyone auditing their own (or authorized) identifier exposure without accounts or fees; the free keyless breach-lookup service. (free service, non-commercial)
OSINT-Framework	—	—	—	— the classic OSINT tool index: categorized sources from public records to social analysis. Used by investigators navigating the OSINT tool landscape; the classic free index that commercial trainings reference. (free service)
ScamSearch	—	—	—	— scammer profile lookup by phone, email or username; crowdsourced anti-fraud intel. Used by fraud investigators checking scammers against a public database; the free lookup for scammer attribution. (free service)
WhatsMyName	—	—	—	— web app plus open database for checking one username across hundreds of platforms at once; keep lookups lawful and authorized. Used by OSINT investigators checking usernames across hundreds of sites; the open web project behind many commercial aggregators.
Whonix	—	—	—	— the anonymity-focused OS: a Workstation VM routed entirely through a Tor Gateway VM. Used by journalists and researchers needing compartmentalized anonymity; the free VM-based anonymity workstation. (GPL-3.0)
